Dense cost, near upright
Final-two-second height successes: 0/4

Energy, 6 s planner, weight 17.78
Final-two-second height successes: 0/2

Energy, 8 s planner, weight 17.78
Final-two-second height successes: 0/2

Energy, 8 s planner, weight 35.56
Final-two-second height successes: 0/2

Tip height (m)

Energy (J)
solid E; dashed PE; dotted KE

Proximity gate g
(diagnostic for dense cost)

Executed native control

Recorded time (s)

Shading: final 2 s. Near-upright cases 0/1 are original; 2/3 use the declared completion. Plots are saved-data reductions, not new simulation.
