Finite LQR capture probes: projections hide conditioning on other coordinates
Failed tested start
Captured tested start
Historical starts
Selected level-set projection
Elbow angle (rad)
Shoulder angle (rad)
Elbow velocity (rad/s)
Shoulder velocity (rad/s)
All 362 tested starts shown; duplicate coordinates overlap. Dashed level set and axis extrema are NOT a captured box or a nonlinear basin proof.
Selected shell 4: calibration 24/24; held-out boundary 64/64 and interior 64/64. Shell 16: 18/24.
