Upright LQR on all four historical starts: one captured

historical_0: failure
saturated 100.0%

historical_1: capture
saturated 0.4%

historical_2: failure
saturated 99.8%

historical_3: failure
saturated 99.6%

Tip height (m)

Raw joint angles (rad)

Joint velocities (rad/s)

Motor torque (Nm)

Time (s)

Joint 0 blue, joint 1 orange. Bottom: blue physical torque 2u Nm; gray unclipped 2u command on symlog right axes (Nm). Shading is final 2 s. Saved native traces; zero new physics.
